WORK EXPERIENCE

Makebell Ltd.

Central, Hong Kong (Remote)

AI Engineer

June 2026 – Present, Full-time

- Built core components of the document-automation agent for an AI legal drafting platform: multi-turn **DOCX drafting and redlining** workflows using the Claude Agent SDK, producing Word-native tracked-change deliverables.
- Designed the document provenance and lineage system ensuring cumulative and version-to-version redlines resolve against the correct baseline, with fail-safe handling for re-uploads, lineage forks, renamed files, and adversarial inputs, backed by 18+ test suites.
- Built the OCR/ingestion pipeline and multi-model LLM orchestration across Anthropic and DeepSeek, alongside the in-browser DOCX viewer/editor and agent runtime security, concurrency, and sandboxing controls.

AskTuring.AI

California, USA (Remote)

Full Stack Software Engineer

July 2024 – May 2026, Full-time

- Architected and executed agentic AI workflows (Cursor, Claude Code) to automate routine engineering tasks and accelerate delivery across frontend, backend, and admin surfaces.
- Designed and shipped large-scale analytics and billing-intelligence features - multi-tenant usage/credit APIs, - using Python, FastAPI, and PostgreSQL on a **SOC 2 compliant LegalTech** platform.
- Built the internal admin application for RAG benchmarking, model intelligence, and user lifecycle management alongside maintaining access management systems(RBAC) and permission control while collaborating in a remote-forst, async global team

Bangladesh Math Olympiad

Bangladesh

Academic Team Member

2022 – Present

- Train students at Olympiad Camps including taking classes, taking tests .
- Develop questions for National and Regional Olympiads.
- Evaluate answer scripts and prepare results at National and Regional Olympiads.

CSEDU Students' Club

University of Dhaka

Secretary of Seminar & Workshop

2023 – 2025

- Organize departmental events and collaborate with other DU departments for inter-department activities.

Notre Dame Math Club

Notre Dame College

Head of HR & Coordinator

2020 – 2021

- Arranged sessions with distinguished researchers and teachers from home and abroad.
- Organized large-scale events to foster students' passion for mathematics.

EDUCATION

University of Dhaka

Dhaka, Bangladesh

CSE, 4th Year 1st Semester; **CGPA: 3.77/4.00**

September 2022 – December 2026 (Expected)

Notre Dame College

Dhaka, Bangladesh

HSC; **GPA: 5.00**

2019 – 2021

TECHNICAL SKILLS

Proficient in: Full Stack Web Development (Python, PostgreSQL, React/NextJS), Olympiad Mathematics

Worked with: C++, LaTeX, Java, Rust, Git/GitHub, Manim, Google Sheets, Blender, Photoshop

ACHIEVEMENTS

2nd Runners Up, Bengali LLM Hallucination Detection Challenge, IUT 12th ICT Fest 2026: Placed third in a national datathon on detecting hallucinated LLM outputs in Bengali; built the detection pipeline and defended the methodology in documentation and a final-round presentation.

2nd Runners Up — Code Samurai Inter University Hackathon 2024: Member of team *DU_Diligence*; focused on rapid development and presentation of innovative solutions for real-world problems.

1st Runners Up — Al-Khwarizmi CTF Contest 2025: Secured second position as part of a four-member team in this nationwide cybersecurity CTF competition at Al-Khwarizmi Science Fest 2025.

Top 10 Finalist — MicroOps Hackathon, CUET CSE Fest 2025: Built an end-to-end automated microservices pipeline with CI/CD, service mesh, and observability during an intensive 11-hour onsite sprint.

1st Place — DU CTF 2024: Member of team *DU_MPLING* in this university-wide CTF competition covering reverse engineering, web exploitation, and forensics.

Honorable Mention — Asian Pacific Mathematical Olympiad: Recognized as top solvers in 2019 & 2021 in this prestigious international mathematics competition for pre-university students.

National Round Champion — Bangladesh Mathematical Olympiad: National winner in 2013, 2017 (Junior Category Champion), 2018, and 2021; competed yearly from 2013–2021 with regional wins and consistent advancement to National Camps.

IMO Team Selection Test Participant: Qualified for and attended selection tests for the International Mathematical Olympiad in 2019 and 2020.

1st Runners Up — 1st Undergraduate Research Summit 2023, University of Dhaka: Team achievement in the university's inaugural research summit.

3rd Place — SCB-PA Inter School College Programming Contest (ISCPC) 2020.

12th Place — National High School Programming Contest (NHSPC) 2017.

PROJECTS

Hopper | *Go, gRPC, Python, FastAPI, K8s, NATS, PostgreSQL, Docker* | Academic Project | Group Project | [GitHub](#)

- Co-architected a distributed, microservices-based **VM cloud platform**, developing a gRPC orchestration engine in Go to interface with the Kubernetes API.
- Authored domain models with complex transactional logic, including an immutable double-entry credit ledger secured by **PostgreSQL** advisory locks.
- Engineered automated containerization and multi-service **CI/CD** pipelines to streamline deployment across the distributed architecture.

KitchenMate | *Flutter, Dart, Firebase, Supabase* | Group of 4 | [GitHub](#)

- Cross-platform mobile app for smart cooking assistance with ingredient management, recipe discovery, custom timers, and offline functionality. Implemented email/Google authentication, recipe search/filter, and developed the to-do list feature.
- **Contributed to Firebase and Supabase integration**, handling initial connection and schema setup and ongoing database maintenance.

AI Study Helper | *Next.js, Python - FastAPI, ChromaDB, Gemini API* | Academic Project | Group of 4 | [GitHub](#)

- Full-stack AI-powered document Q&A system using **Retrieval-Augmented Generation (RAG)** for intelligent study assistance. Students can upload PDF documents and ask natural language questions to receive context-aware answers.
- Built FastAPI backend with **ChromaDB vector database** for semantic search and **Google Gemini API** for embeddings and LLM responses. Implemented **Celery with Redis** for asynchronous PDF processing.
- Developed Next.js frontend with Supabase authentication and persistent chat sessions. Features multi-user support with isolated document collections per user.

SecureFile | *Python* | Academic Project | Group of 2 | [Backend - GitHub](#) | [Desktop App - GitHub](#)

- A desktop app that lets a user store files securely on the cloud with server-side encryption.
- As this project was part of Networking Lab, we implemented TCP features such as reliable data transfer and flow control on the application layer for learning purposes.
- This also featured chunking of files and server-side encryption (AES 256) for the chunks, alongside a Qt-based desktop application.

TEMS Academy LMS | *Next.js 14, TypeScript, Supabase* | Personal Project | [GitHub](#)

- Developed a full-stack Learning Management System (**LMS**) for [TEMS Academy](#), an Olympiad Math coaching center, where I used to work as an **Olympiad math trainer**.
- Seeing them struggling with spreadsheets' repetitive tasks, I made this to streamline managing student data (exam scores and rank history) and weekly exam result generation (PDF Resultsheet). Built with Next.js 14 and TypeScript with Supabase PostgreSQL as the database for storage, featuring a mobile-responsive UI.

CGPA Calculator | *React, HTML, CSS, JavaScript* | Personal Project | [GitHub](#)

- Built a **CGPA Calculator** as a hobby in my first year, using React.
- This is used by my batchmates regularly, featuring calculations for theory and lab subjects, including previous CGPA, with a **mobile-responsive design**.

Hill Climb Racing Clone | *C++, SDL2, Custom Physics Engine* | Academic Project | Group of 2 | [GitHub](#)

- 2D physics-based game recreation with custom collision detection, fuel management, and audio integration. Designed and implemented the custom physics engine and Entity Component System (ECS) architecture.
- Developed input systems and graphics rendering components, contributing to core gameplay mechanics.

NutriCulinary | *Next.js, TypeScript, Supabase, Tailwind CSS* | Academic Project | Group of 2 | [GitHub](#)

- Full-stack personalized meal planning platform with recipe recommendations based on dietary preferences, nutritional goals, and available ingredients. Features an admin dashboard and real-time data synchronization.
- **Implemented frontend logic** for data fetching, processing, and display, including the **admin dashboard** and user authentication.
- Managed **Supabase integration** with Next.js, ensuring seamless data flow.
